"FELT AND ROSEMARY ROOFS"

Year 1 of 5 year programme

No of Houses

The replacement of the existing roof covering with the appropriate long life replacement. All remedial woodwork is to be carried out to wall heads, joist, rafters, barges, fascia and soffits and new rainwater goods are to be provided. Any repairs or replacement of ancillary elements or protections are to be repaired/replaced as required; this includes, but is not limited to: insulation; lintols cills, soffits, windows, doors. Sold Houses are listed for information as they have a material impact on the progress of the work. There is an initial five year programme of which the first year is listed below. Most of the properties in these years will also require significant render works, and high levels of render disrepair is evident particularly in Boghall.

"PERIODIC TESTING"

No of Houses

These houses will be inspected this year to find any obvious or hidden faults in the electrical supply and distribution system. There will be varying amounts of work needing done to each house varying from none to a full rewire. The need for each will be determined by the in depth inspection carried out by our senior qualified electrical engineers. Each house in our stock will be surveyed in this manner once in every 10 years period (hence 'Periodic Testing') or when the house becomes vacant and is to be relet.

"EXTERNAL LIGHTS"

No of Houses

Houses in these areas will be inspected this year to determine whether the front and back door and accesses to them are adequately and safely lit. New, suitable, lights will be fitted wherever this is not the case. Existing records of installations and results from the SHQS survey have narrowed down the houses to be inspected.

Detectors

No of Houses

An initial 500 houses in areas of West Lothian where there is no gas supply, or houses and complexes with no gas supply will be the first to have new mains wired smoke detectors fitted. These are permanently wired to the electrical supply and do not rely on a battery although there is a rechargeable battery inside the unit to maintain the alarm capability even in the event of a power cut. The budget go on to support the extension of the programme to supported accomodation.

Approximate Total			500

Central Heating

No of Houses

These houses are to have the boilers replaced due to the immediacy of parts redundancy. Central heating distribution (pipes, radiators, TRV's, tanks) will all be checked by the Gas engineers and repaired or replaced as required. In addition to the addresses listed below additional properties may arise through the year due to inability to service or uneconomomic repair and these will be added to this contract where a level of budget provision has been set aside.
