Introduction.....1
Making the visit safe.....1
Before your visit: 1
During and after the visit:..... 2

Introduction

All animals naturally carry a range of micro-organisms, some of which can be transmitted to humans, where they may cause ill health. Some infections which may be contracted on farms, such as the bacterium Escherichia coli O157 (E coli 0157), present a serious hazard and potentially cause severe disease which may be particularly acute in young children.

Making the visit safe

While the hazard from infection resulting from a farm visit is real, the risks are readily controlled by everyday measures. The following sensible steps will help make your visit even more safe, healthy and enjoyable.

Before your visit:

- You may wish to go to http://www.hse.gov.uk/Pubns/ais23.Pdf and then discuss visit arrangements with the farm management. Assure yourself that the facilities provided match the recommendations on the HSE web site;
Decide what the ratio of pupils to teachers/assistants/parents should be. As a general rule, the ratio of supervisors to children should be 1:1 for children under 1 year old, 1:2 for children between 1 and 2 years old, 1:4 for children between 3 and 5 years old, and 1:8 for those between 5 and 8 years old. If supervision levels are less than this, you should not allow direct contact with the animals for children under eight;
Discuss with the supervisors, who may be parents or staff of the school, creche etc, their role during the visit. They must understand the need to make sure that the children wash, or are helped to wash, their hands thoroughly after contacting animals, and follow the other rules suggested below:
Discuss with pupils the rules for the visit, stressing that they must not eat or chew outside the areas in which you permit them to do so;
Make sure that pupils wear appropriate clothing, including sturdy outdoor shoes (not sandals) or wellington boots if possible;
Check that cuts, grazes etc on children’s hands are covered with a waterproof dressing.

Reproduced by kind permission of the Health and Safety Executive.

During and after the visit:

make sure that the children -

- Do not kiss animals;
- Always wash their hands thoroughly before and after eating, after any contact with animals and again before leaving the farm;
- Eat only food that they have brought with them, or food for human consumption they have brought on the farm, in designated areas, and never eat food which has fallen to the ground, or taste animal foods;
- Do not suck fingers or put hands, pens, pencils or crayons etc in mouths;
- Clean or change their footwear before leaving, remembering to wash their hands after any contact with animal faeces on their footwear.

Check that the children stay in their allocated groups during the visit, and that they:

- Do not use or pick up tools (eg spades and forks) unless permitted to do so by farm staff;
- Do not climb on to walls or animal pens etc;
- Listen carefully and follow the instructions and information given by the farm staff;
- Approach and handle animals quietly and gently;
- Do not chase, frighten or torment the animals.

Remember:

- The children are your responsibility during the visit;
- You should supervise them during the visit, especially during hand washing to make sure that each child washes thoroughly. Farm staff may be able to help with this supervision;
- Allow plenty of time before eating or leaving so that the children do not have to rush.

If a member of your group shows signs of illness (eg sickness or diarrhoea) after a visit, advise them or their parent/guardian to visit the doctor and explain that they have had recent contact with animals.
